

### Heat Pumps using A2L refrigerants with hot surface ignition temperature above 800°C

Dab Pumps SPA confirms that the following circulator pump type:

Evosta 2  
Evosta 3  
Evosta 2 OEM  
Evosta 2 OEM PWM  
Evosta 2 SOL  
Evosta 2 SOL PWM  
Evosta 2 SAN

Complies with IEC 60335-2-40:2022 §22.116 and fulfils the test in §22.117.1 and is therefore according to the standard not considered to be a potential ignition source during normal operation.

### Heat Pumps using Propane and other A3 refrigerants with auto ignition temperature above 470°C

Dab Pumps SPA confirms that the following circulator pump type:

Evosta 2  
Evosta 3  
Evosta 2 OEM  
Evosta 2 OEM PWM  
Evosta 2 SOL  
Evosta 2 SOL PWM  
Evosta 2 SAN

Complies with IEC 60335-2-40:2022 §22.116 and fulfils the test in §22.117.1 and is therefore according to the standard not considered to be a potential ignition source during normal operation.
